

LAPLAND ICE DRIVING

LIKE NOWHERE ELSE

GENERAL
PRESENTATION

LAPLAND
ICE DRIVING

THE WORLD'S LARGEST
DRIVING CENTRE

Imagine drifting at more than 125 MPH
in total safety round an F1 circuit...

...reproduced full-scale on a frozen lake,

...behind the wheel of a high-powered
sports car.

...under the Northern Lights of Swedish
Lapland.

Welcome to Lapland Ice Driving.

THE WORLD'S ICE DRIVING REFERENCE FOR MORE THAN 17 YEARS

- The world's largest driving centre
- Exclusive - the most famous F1 circuits reproduced full-scale on a frozen lake
- Up to 125 MPH in total safety for the ultimate pleasure
- Up to 160 miles drifting each day
- A fleet of exceptional cars (Ferrari, Porsche, Maserati, Lamborghini...) specially prepared for extreme conditions
- Personal in-car tuition by highly qualified instructors using unrivalled and proven technique
- Tailor-made services ensure a truly unique experience
- Registered travel agency ensures no-fuss arrangements
- Major environmental commitment with Planète Urgence
- A first-class ambassador: Yvan Muller

SUSTAINABILITY

OUR COMMITMENTS

Our activities create around 200 tonnes of CO2 per season, then in order to become **environmentally fully neutral**, we take the following actions:

- Investment in the LID Forest project, consisting in restoring the ecosystem through the reforestation of various species, the development of sustainable production of wild silkworms (of which tapia is the habitat) and honey. No less than 10,000 trees are planted each year, absorbing more than 800 tonnes of CO2 per year.
- The use of **bio-fuel** HVO100 for all diesel vehicles and heating machines, reducing by 90% their CO2 emissions.
- The use of wood pickets on the lake, to materialise the tracks.

SUSTAINABILITY

PROJECT

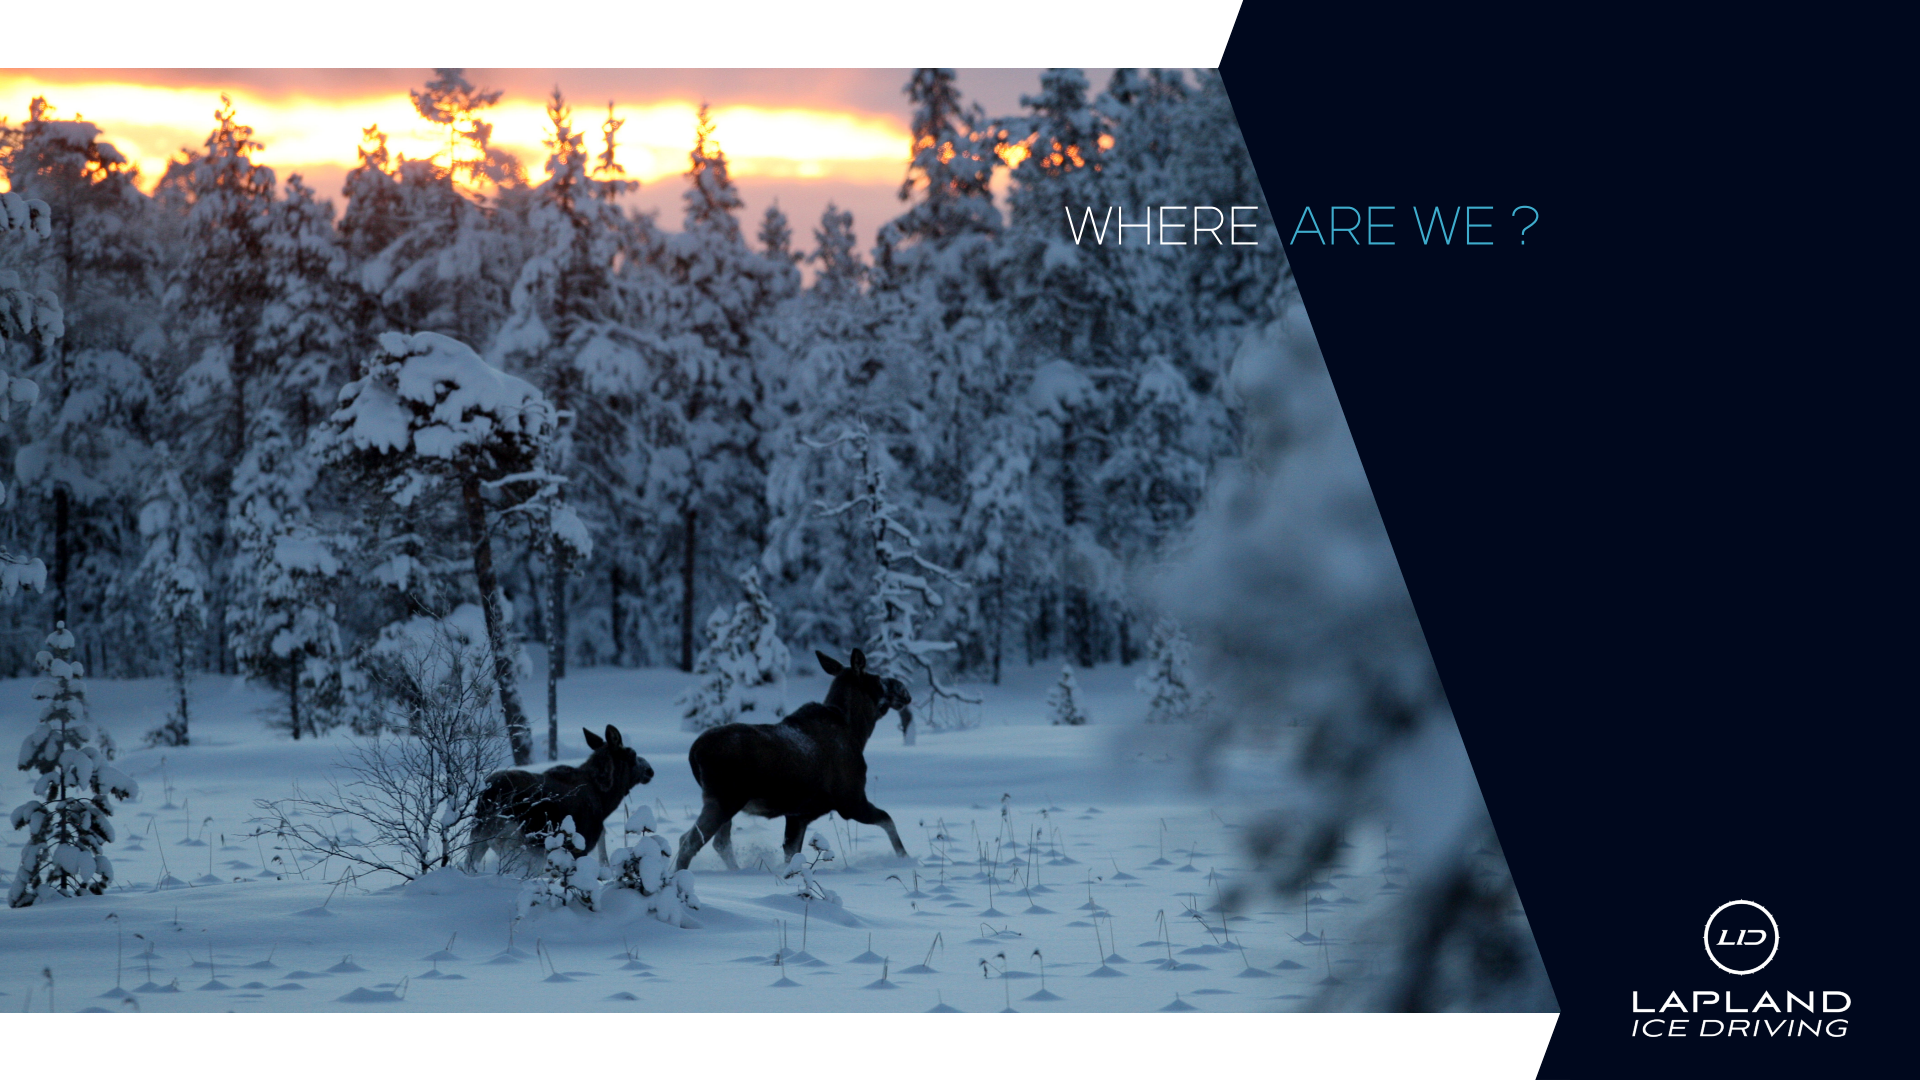

THE ARCTIC CHALLENGE

- 10 teams composed solely of students, from the best engineering schools in the World, build their own **electric vehicle**.
- Vehicle are made of **recyclable materials** only.
- The challenge is to achieve the best time on 10 laps of the circuit, and to consume as little energy as possible.
- **The entire project (including logistics) is designed to be 100% carbon-free.**
- LID provides infrastructures and logistics support.
